TSIRCO-POLYCRETE 1001

Tile Grouting Material

Product

One part ready-to-use tile grout based on polymeric cements.

Composition

Polymeric pointing material.

Purpose

TSIRCO-POLYCRETE 1001 is a polymeric pointing material which has excellent bonding abilities and can resist most chemicals. It also offers good waterproofing and abrasion resistance.

Usage

Suitable for most applications including industrial floors where chemical resistance is recommended. For very aggressive and concentrated chemicals use TSIRCO-RES 231.

Colours

Product is available in grey, white, red and green shades or in any other colour upon request.

Coverage

Coverage rate depends on the tile and joint dimensions. Density of mixed materials is 1.8kg/lt.

Pack

24kg bags
